

**The Seventeenth Information Security Conference (ISC 2014)
12-14 October 2014, Hong Kong**

The Information Security Conference (ISC), which started as a workshop (ISW) in 1997, is an international conference organized yearly. It has been held in 5 different continents. The conference time and place puts it after *ProvSec 2014* in the same venue. This is a wonderful opportunity to attend two excellent security conferences in one trip!

The conference seeks submissions on novel theoretical and practical results of:

access control	economics of security and privacy	security in information flow
accountability	electronic frauds	security in IT outsourcing
anonymity & pseudonymity	embedded security	security for mobile code
applied cryptography	formal methods in security	secure cloud computing
authentication	identity management	security in location services
biometrics	information dissemination control	security modeling & architectures
computer forensics	information hiding & watermarking	security in social networks
cryptographic protocols	intrusion detection	security & privacy in pervasive & ubiquitous computing
database security	network security	security of eCommerce, eBusiness & eGovernment
data protection	peer-to-peer security	security models for ambient intelligence environments
data/system integrity	privacy	
digital right management	secure group communications	trust models & trust policies

All submissions are eligible for the competition of (We reserve the right not to give any award)
 - *best paper*, if one of the authors will present the paper
 - *best student paper*, if at least one full-time student is the presenting author in the conference
